Professional Summary

Full-stack web developer with hands-on experience in building scalable and user-centric web applications using the MERN stack and Next.js. Skilled in developing responsive interfaces, RESTful APIs, and AI-assisted platforms. Proven experience delivering real-world solutions, including a production-level company website for a manufacturing firm. Strong foundation in problem-solving, system design, and collaborative development, with a focus on writing clean and maintainable code

Skills

Frontend: React.js, Next.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS
Backend: Node.js, Express.js, MongoDB, REST APIs, WebSockets
Programming: Java, Python (Flask/FastAPI), NLP (spaCy)
Tools: Git, GitHub, VS Code, Cursor, Postman
Other Skills: UI/UX Design, Responsive Design, Authentication Systems

Experience

FrontEnd Development Intern | Om Techno Pvt. Ltd. **May 2025 – July 2025**

- Developed and deployed a responsive company website using Next.js, React, and Tailwind CSS, improving digital presence.
- Collaborated using Git-based workflows for version control and project management.
- Optimized UI/UX for better accessibility and performance across devices.
- Demonstrated practical application of modern frontend frameworks in industrial use cases.

Projects

Smart Placement & Career Recommendation Portal **Jan 2026-March 2026**

Tech Stack: React, Node.js, Express.js, MongoDB, Vite, JavaScript, Gemini API, Framer Motion

- Developed an intelligent placement platform connecting students with recruiters through resume uploads, job recommendations, and structured career guidance.
- Designed and implemented student dashboards for profile management, resume parsing, application tracking, and personalized job and skill suggestions.
- Built scalable backend APIs for authentication, student profiles, job applications, recruiter job postings, and offer management.
- Engineered an AI-driven recommendation system to match student skills with relevant job opportunities and generate career pathways.
- Structured recruiter/admin modules for job posting, vacancy management, and applicant tracking.

Sleep Disorder Diagnosis & Recommendation System **Nov 2025-Jan 2026**

Tech Stack: MERN, JavaScript, Node.js, Gemini API

- Developed an intelligent system to assess sleep disorders using a structured questionnaire and rule-based scoring mechanism.
- Designed algorithms to analyse user responses and generate an initial diagnostic score based on sleep patterns and behavioural factors.
- Integrated AI capabilities using the Gemini API to enhance diagnosis accuracy and provide personalized recommendations.
- Generated actionable insights, including lifestyle improvements and sleep optimization strategies based on user data.
- Focused on combining deterministic logic with AI-driven analysis for more reliable and explainable results.

Education

Bachelors of Technology in Computer Science & Engineering – Sharda University **2023 – Present**
Intermediate – St. Paul's Academy **2022 – 2023**
High School – St. Paul's Academy **2020 – 2021**

Certification & Achievements

- Participated in Smart India Hackathon (SIH) 2025 and finished among Top 50 teams in internals.
- Participated in Lovable AI Hackathon – Built and deployed a blog platform (Chronicle)
- Complete Full Stack Web Development – Udemy (2024)
- Oracle Java Certification (2024).
